English

Adaptable Full-stack Software Engineer with 6+ years of experience in PHP (Laravel), JavaScript (Vue.js), and Flutter mobile app development. Proven track record in building scalable SaaS platforms, optimizing databases, and leading cross-functional teams.

Interested about AI, machine learning, and delivering high-quality, user-focused software solutions. Aiming to leverage my skills to successfully fill the Software Engineer role at your company.

Working Experience

Tech IT Mantra

July 2021 - December 2023

Fullstack Engineer

Remote

- Working closely with Product Owner, UI Designer and QA Engineer to develop and maintain SaaS Telehealth Platform for US-Based company
- Convert UI design from Figma to nice looking UI with Vue.js
- Maintain and optimize analytical dashboard which help user utilize & organize their providers and schedules

Universitas Dinamika

January 2015 - May 2021

Senior Software Engineer

Surabaya, Indonesia

- Analyzed user needs and collaborated with clients to define, refine, and maintain software system designs, ensuring feasibility within strict time and budget constraints while aligning with business goals.
- Led and supervised a cross-functional team of Junior Engineers, UI Designers, and QA Engineers to ensure timely delivery of high-quality features.
- Optimized legacy codebase and successfully migrated core systems to newer frameworks, improving performance, maintainability, and scalability.

Projects

DestinasiKu

October 2024 - March 2025
